

## International Research Network on Citizenship and Dementia

Welcome to the 1st network meeting that is held during the conference "Life with Dementia 2014: Relations", Norrköping, Sweden, 15-17 October 2014

**Linköping University**

# Welcome to Norrköping and Linköping university

We are delighted to invite you to the 1st meeting for the international research network on Citizenship and Dementia.

The three-day network meeting will be held within and in parallel of the conference "Life With Dementia 2014: Relations", in Norrköping, Sweden 15-17 October 2014.

As you will see in the programme, some presentations are organised under Stream2: "Citizenship and Dementia" while other presentations, that are also covering the theme, are for practical reasons organised under other streams of the conference. So please check the programme!

The purpose of the network meeting is to discuss, reflect, problematize and link various theoretical as well as empirical, practical approaches on its main theme: citizenship and people with dementia. The network meeting also aims to sketch out research collaborations and also plan future possible publishing strategies.

At the end of the conference, on Friday 17 after lunch, from 13.45 – 15.00, we will have scheduled time for a network meeting where we can elaborate on these strategies further.

We are grateful for the financial contribution to this initial network meeting by the Riksbankens Jubileumsfond – The Swedish Foundation for Humanities and Social Sciences. Also, many thanks to CEDER – Center for Dementia Research, at Linköping university, which has been a great organisational platform to make this initiative become real.

Looking forward to many interesting fruitful discussions and to see you all here in Norrköping!

Ann-Charlotte Nedlund,  
PhD, [ann-charlotte.nedlund@liu.se](mailto:ann-charlotte.nedlund@liu.se)

intitiater and coordinator of the network, and coordinator of the research group "Policy, citizenship and dementia" ,  
at CEDER – Center for Dementia Research, Linköping university, Sweden
