**Time:** 13.15 - 14.15

**Location:** Studenthuset,  
Campus Valla Linköping

---

## OPEN INVITATION

*No registration required.  
Everyone is welcome!*

## SCHOLARSHIP AWARD - OCTOBER 25

On account of a donation by our alumnus Christer Gilén, LiU has recently had the opportunity to establish two brand new scholarships in the fields of "Statistics and Machine Learning" and "Management Control, Organization and Innovation". The first awards ceremony will take place on October 25th, with a presentation of winning master's theses by this year's fellows. Christer Gilén will attend in person and bestow the SEK10,000 scholarships to each holder.

## THIS YEAR'S FELLOWS

### **Goutam Bhat**

The master's thesis "*Accurate Tracking by Overlap Maximization*" treats the problem of generic visual object tracking and is published in one of the highest ranked conferences in computer science. There are many applications, from monitoring to autonomous systems and human-computer interaction.

### **Emma Berg och Cecilia Josefsson**

In the master thesis "*Enabling Digital Transformation - A Dynamic Capabilities Approach*", a general framework is developed that can be used by organizations to build a dynamic digital capability in their business. The framework is based on a dynamic capability perspective and consists of nine critical factors contributing to digital transformation in organizations.

### **A warm welcome!**

*/Mattias Villani (IDA), Nicolette Lakemond (IEI)  
och Kristina Lyngenberg (LiU Donation)*
