
Nov 10

09.00	Registration, coffee	
09.30	Introduction	<i>Charlotta Dabrosin, Stig Linder</i>
09.35	Integration of mechanical forces in development and cancer	<i>Lars Holmgren</i>
10.35	Studies of hypoxia induced metastasis development and anti-angiogenesis therapy resistance	<i>Eva-Maria Hedlund</i>
11.00	Estradiol-induced overexpression of LFA-1 in neutrophils via TGFb-1 promotes breast cancer dissemination	<i>Gabriela Vazquez Rodriguez</i>
11.20	“Cellkärnan”	<i>Peter Söderkvist</i>
12.15	Lunch	
13.15	Strategy discussions	<i>PIs</i>
	Clinical case(s)	<i>Post docs and PhD students under direction of Annika Malmström, Anna-Lotta Hallbeck and Nils Elander</i>
14.45	Can omics analysis of T cells in peripheral blood contribute to early cancer diagnosis?	<i>Mikael Benson</i>
15.05	Coffee	
15.30	Interactive poster session	<i>LiU Cancer project presentations</i>
17.00	Free time	
19.00	Dinner	

Nov 11

07.00-08.30 **Breakfast**

08.30 Improved therapy of malignant melanoma based on insights in molecular genetics *Johan Hansson*

09.30 Optical Biopsy for Real-time Brain Tumour Diagnostics during Stereotactic Neurosurgery *Karin Wårdell*

09.50 **Coffee**

10.15 Agilent Technologies *Dennis Buurman*

10.35 Ubiquitin-specific protease 6 (USP6) regulates autophagy associated chemo-resistance to 5-Fu in CRC *Senlin Zhao*

10.55 Novel inhibitors of the proteasome DUB USP14 *Arjan Mofers*

11.15 Tumour biomarkers for adjuvant chemotherapy in pancreatic cancer *Nils Elander*

11.35 Targeting mitochondrial bioenergetics to eradicate quiescent tumor cells *Stig Linder*

11.55 *Conclusion*

12.00 **Lunch**

Welcome!
