

Research supervision

This course is intended for persons who have a doctoral degree and undertake supervision or co-supervision of PhD students.

Course in Higher Education

The course consists of two parts: a part that is common to the entire university, and a faculty-specific part. Information about the faculty-specific parts is given at the bottom of this page, and participants should contact the person who is responsible for the part given at their faculty.

The cross-university part (corresponding to 2 weeks) concerns learning processes and the development of personal skills in relation to experience. This part covers also research into higher educational pedagogy in the field of research supervision.

The faculty-specific parts (corresponding to 1 week) concern the rules, practices, study plans and action plans, the value of higher education based on gender equality, equal opportunities, and sustainable development, the cultures and work methods of third cycle education, and the areas of responsibility of the faculty offices' and faculty and PhD education boards, the faculties view of PhD education, and the requirements for qualifications.

At the Faculty of Medicine, issues relating to supervision in problem-based learning (PBL), student-centered learning and integration between subjects, programs, research and professions are discussed.

External participants who have no connection to LiU may participate in the cross-university part of the course, corresponding to 2.5 credits. The only faculty-specific part that external participants may participate in is the one given by the Faculty of Medicine and Health Sciences.

Syllabus

- See separate link

Brief facts

- The course includes 120 hours of full-time study.
- Attendance at course days is compulsory.
- Between the course days, participants study in the form of reading literature and completing course assignments.

In connection with the course registration, participants are expected to:

- Consider carefully whether they will have sufficient opportunity for both participation and completion of the course, given their other commitments and duties.

Registration conditions

The course may become fully booked before the closing date. If too few participants register, the course may be cancelled. If a student registers and later withdraws without special reasons after the closing date for application (which is normally 1 month before the start of the course), Didacticum will charge the applicant's department/unit SEK 2000.

Course 2301 (English)

Course days:

- March 6 - online
 - March 7 - Didacticum
 - April 4 - Didacticum
- About 09.15-16.30 all course days

Application form

Application deadline: February 15, 2023

Room

Didacticum, Student House, floor 5, Campus Valla/Zoom

Charge

- SEK 4000, internal participants
- SEK 6000, external participants

Course leader: Per-Anders Forstrop, per-anders.forstorp@liu.se

Course coordinator: Monika Samuelsson, monika.samuelsson@liu.se

Faculty-specific information

Faculty of Medicine and Health Sciences

Annelie Lindström annelie.lindstrom@liu.se

Course days:

- VT2023 9-10 mars + 21 april
- HT2023 5-6 oktober + 17 november

Charge: SEK 4000
