

AI risk as a global environmental problem

Welcome to Environmental Change Higher Seminar

May 24, 2023

13.15-14.30

Room: Temcas, Tema Building, Campus Valla

No registration

Olle Häggström is a professor of mathematical statistics at Chalmers University of Technology and a member of the Royal Swedish Academy of Sciences. His main research focus is on AI futurology, existential risk and the long-term future of humanity. Of his five books, the two latest are *Here Be Dragons: Science, Technology and the Future of Humanity* (Oxford University Press, 2016) and *Tänkande maskiner: Den artificiella intelligensens framtid* (Fri Tanke, 2021).
