

TEMA'S DATA LAB

INVITES YOU TO A HANDS-ON
WORKSHOP ON

SCHOLARLY RESEARCH IN PLAINTEXT:

USING THE ZETTLEKASTEN
METHOD, MARKDOWN,
AND PANDOC TO
ORGANIZE A SUSTAINABLE
SCHOLARLY WORKFLOW

LED BY: CHARLES BERRET

POST-DOC AT TEMA-G / MEDIA AND
INFORMATION TECHNOLOGIES

Every researcher needs a system to organize their work, but many tools and platforms end up working against us. The purpose of this workshop is to examine how the tools we use impact how we conduct scholarly research, especially when those tools are a source of friction with the mental models that best match our projects, practices, and materials. Focusing specifically on text-based research practices, we will explore the Zettelkasten method as a platform-independent, open-source workflow developed in the Digital Humanities to support scholars in gathering, organizing, and developing ideas from notes, to drafts, to manuscripts.

**EVERYONE IS WELCOME!!
