

Tema's DATA LAB invites you to a **Data & Ethics Workshop**

During the workshop we will test, explore and discuss the **Data Ethics Decision Aid** framework developed by scholars at the Data School at Utrecht University.

Join as a **tester** with a relevant case project, where there are no strict requirements – only your eagerness to test the tool on your data and ethics-related project. Alternatively, you can join as a **participant/discussant**, without the need for an ongoing project.

Time

20 October, 09.30-14.00, including lunch.
(It is also fine to join just for the morning session, but please let us know.)

Pre-register your participation

Register to satenik.sargsyan@liu.se by Oct. 6.
Please indicate if you would be participating as a tester or a participant/discussant.

Place

DigiMaker, Studenthuset, Campus Valla.

All are welcome!
