Programme course

7.5 credits

Research Design and Methods

733A48

Valid from: 2010 Autumn semester

Determined by

The Quality Board at the Faculty of Arts and
Sciences

Date determined

2010-12-17

Main field of study

Political Science

Course level

Second cycle

Advancement level

AIN

Course offered for

- Master's Programme in International and European Relations

Entry requirements

Bachelor's degree, equivalent to a Swedish Kandidatexamen, in political science, international relations, economics, history, geography, law, media studies, sociology and other social sciences or other disciplinary backgrounds, if applicants can demonstrate ability to develop their potentials in the subject area,

English corresponding to the level of English in Swedish upper secondary education (English 6/B). Exemption from Swedish 3.

Intended learning outcomes

After completion of the course the student should be able to:

- recognize, understand and discuss contending positions on ontology and epistemology in the social sciences;
- display a deeper understanding of research traditions with relevance for the study of International and European relations;
- identify and understand the various stages of the research process, in relation to actual examples of research in the relevant fields;
- design and present an outline of an independent scientific investigation.

Course content

The central themes of the course are:

- an introduction to the philosophy of science;
- research traditions in the social sciences;
- the design of social and political research;
- conceptual, procedural and ethical considerations in research;
- advanced academic writing.

Teaching and working methods

The course offers lectures which introduce and develop the content of the course. Lectures are complementary to the literature. Seminars and workshops are important aspects of the learning process and provide opportunities for mutual, critical discussions which develop attitudes and skills. Students are expected to be well prepared for lectures and to have completed assigned preparations for seminars. Students are expected to read and take in the literature independently and/or in self-organized reading groups. Language of instruction is English. Activities which constitute elements of examination are mandatory.

Examination

The course is examined through a combination of mandatory seminars and workshops, a home examination, and writing and presenting a thesis proposal. Detailed information about the examination can be found in the course's study guide.

If the LiU coordinator for students with disabilities has granted a student the right to an adapted examination for a written examination in an examination hall, the student has the right to it. If the coordinator has instead recommended for the student an adapted examination or alternative form of examination, the examiner may grant this if the examiner assesses that it is possible, based on consideration of the course objectives.

Students failing an exam covering either the entire course or part of the course twice are entitled to have a new examiner appointed for the reexamination.

Students who have passed an examination may not retake it in order to improve their grades.

Grades

ECTS, EC

Other information

Planning and implementation of a course must take its starting point in the wording of the syllabus. The course evaluation included in each course must therefore take up the

question how well the course agrees with the syllabus.

The course is carried out in such a way that both men's and women's experience and knowledge is made visible and developed.
