

# Zoology, Morphology and Systematics

Programme course

6 credits

Zoomorfologi

NBIA27

Valid from: 2019 Spring semester

**Determined by** 

Board of Studies for Chemistry, Biology and Biotechnology

**Date determined** 

2018-08-31

# Main field of study

**Biology** 

## Course level

First cycle

#### Advancement level

G<sub>1</sub>X

#### Course offered for

• Bachelor's Programme in Biology

## **Entry requirements**

Note: Admission requirements for non-programme students usually also include admission requirements for the programme and threshold requirements for progression within the programme, or corresponding.

# Intended learning outcomes

The course intends to provide knowledge about animal diversity, including morphology and systematics for a defined number of animal groups\*. After the course each student should

- be able to describe the following animal groups\* considering both systematics and functional morphology: Protozoan, sponges, flatworms, roundworms, segmented worms, mollusks, arthropods, echinoderms and chordates.
- be able to recognize the above-mentioned animal groups and label them in a correct systematic way
- be able to describe different systematic principles and what the classification system of animals is based on
- be able to discuss basic principles around the question "what is an animal?"
- have the knowledge of how to perform an animal dissection

#### Course content

The course intends to provide knowledge about animal diversity based on morphology, functions and modern systematics including an evolutionary perspective. The diversity of the animal kingdom is exemplified by studies of the following animal groups: Protozoan, sponges, flatworms, roundworms, segmented worms, mollusks, arthropods, echinoderms and chordates including vertebrates.

# Teaching and working methods

Lectures and laboratory course. The laboratory course is compulsory and requires active participation.

#### **Examination**

LAB1	Laboratory work	1.5 credits	U, G
TEN1	Written examination	4.5 credits	U, 3, 4, 5

#### Grades

Four-grade scale, LiU, U, 3, 4, 5

## Department

Institutionen för fysik, kemi och biologi

# Director of Studies or equivalent

Agneta Johansson

## **Examiner**

Thomas Östholm

## **Education components**

Preliminary scheduled hours: 56 h Recommended self-study hours: 104 h

## Course literature

Hickman, Roberts, Keen, Larson, Eisenhour: Animal Diversity, 7th ed. (2015), McGraw-Hill. Kompendiematerial producerat vid avdelningen.
