

Perspectives on Mathematics

Programme course

1 credits

Matematiska utblickar

TATA40

Valid from: 2017 Spring semester

Determined by

Board of Studies for Electrical Engineering,
Physics and Mathematics

Date determined

2017-01-25

Main field of study

Mathematics, Applied Mathematics

Course level

First cycle

Advancement level

G1X

Course offered for

- Applied Physics and Electrical Engineering - International, M Sc in Engineering
- Applied Physics and Electrical Engineering, M Sc in Engineering
- Physics and Nanoscience, Bachelor's Programme
- Mathematics, Bachelor's Programme
- Computer Science and Software Engineering, M Sc in Engineering
- Computer Science and Engineering, M Sc in Engineering
- Information Technology, M Sc in Engineering
- Biomedical Engineering, M Sc in Engineering
- Physics, Bachelor's Programme
- Mathematics, Bachelor's Programme

Entry requirements

Note: Admission requirements for non-programme students usually also include admission requirements for the programme and threshold requirements for progression within the programme, or corresponding.

Prerequisites

Admission to the course requires , as well as general university requirements, secondary school mathematics (or equivalent).

Intended learning outcomes

To impart an understanding of mathematics, its history and its function in education and

society.

Course content

The contents vary from year to year. The lectures take up the following themes:

- Special topics in analysis and algebra.
- History of mathematics.
- Application and uses of mathematics in science and technology.

Teaching and working methods

Lectures. The course continues throughout the first year.

Examination

ANN1 Participation in at least 12 of 16 lectures
Grades are given as 'Fail' or 'Pass'.

U, G 1 credits

Grades

Two-grade scale, U, G

Department

Matematiska institutionen

Director of Studies or equivalent

Jesper Thorén

Examiner

Hans Lundmark

Education components

Preliminary scheduled hours: 32 h

Recommended self-study hours: -5 h

Course literature

Additional literature

Other

References will be given at each lecture.

Common rules

Regulations (apply to LiU in its entirety)

The university is a government agency whose operations are regulated by legislation and ordinances, which include the Higher Education Act and the Higher Education Ordinance. In addition to legislation and ordinances, operations are subject to several policy documents. The Linköping University rule book collects currently valid decisions of a regulatory nature taken by the university board, the vice-chancellor and faculty/department boards.

LiU's rule book for education at first-cycle and second-cycle levels is available at http://styrdokument.liu.se/Regelsamling/Innehall/Utbildning_pa_grund-_och_avancerad_niva.
